Spot and arc welding

By Harry Archer Hornor

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 66 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1920 Excerpt: . . . not reduce the light intensity so low that vision is difficult. The arc welder must see as much as possible what is going on while the electrode is depositing metal in the weld. Protective lenses may be mounted in three ways. For inspection work a pair of close-fitting goggles is all that is necessary. They must be screened at the sides, because the invisible ultraviolet and infra-red rays are reflected in the same way as visible rays. Goggles do not protect the operator as well as a hand screen. He can quickly lay this down when he has broken his arc and it gives him a ready means for viewing quickly his cooling metal. The screen covers his face and chest, giving him protection on all sides. Some operators claim a liking for the screen on the basis of its steadying quality; that is, by holding...
