Lariat Publishing, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. 47.5 million people throughout the world have been diagnosed with dementia and there are 7.7 million new cases every year. Alzheimer s disease is the most common type of dementia accounting for upwards of 70 of all cases. Alzheimer s disease is the sixth-leading cause of death in the United States, and is the fifth-leading cause of death among those age 65 and older and a leading cause of disability and poor health. In fact, Alzheimer s disease alone, not counting those diagnosed with one of the dementias, affects upwards of 5.5 million adults in the United States alone. Although the figure is anticipated to rise to 16 million by the year 2050, you DO NOT have to become part of the statistic! There are natural options available that can significantly lessen your risk of succumbing to dementia, which will also serve to significantly lessen your likelihood of developing a number of common health issues that predispose one to dementia or Alzheimer s including type two diabetes, cardiovascular disease, and high blood pressure, especially if a healthy lifestyle is adopted early in childhood and maintained throughout one s life. For adults, even if you ve already been diagnosed with one or more of the risk factors discussed within this book, there are still a number of natural steps you can take to significantly reduce the likelihood of developing dementia, as well as lessen the severity or likelihood of developing any of the associated risk factors. Preventing Dementia, Naturally will help you do just that -- prevent dementia naturally and help you transform into a healthier you whatever your age! Join Dr. Danielle West-Stellick on a journey exploring the basic facts about dementia and...
