CROSS-PHASE AND SELF-PHASE MODULATION : EFFECT ON THE PERFORMANCE OF A WDM LINK

VDM Verlag Apr 2010, 2010. Taschenbuch. Condition: Neu. This item is printed on demand - Print on Demand Neuware - Optical amplifiers not only permit propagation of lightwave signals over thousand of kilometers, they also enables the use of massive WDM system and have led to the development of lightwave systems with capacities exceeding 1Tb/s. Fiber nonlinearities plays a very important role in designing such high capacity lightwave system. Two such nonlinear effects, cross-phase modulation (XPM) and self-phase modulation (SPM)...
