Fabricated by Using Metal Coated Powders

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Fabricated by Using Metal Coated Powders | This research presents a novel technique to enhance thermoelectric properties of p-type Bi_{0.5}Sb_{1.5}Te_{3.0} (BST) polycrystalline materials by producing nano-to-micro sized porous structures in bulk samples. We initially coated BST powder with Tellurium nanowires. Thus, we designed a fast and inexpensive technique to synthesize Tellurium Nanowires with diameters ranging from 10 150 nm. There is a huge possibility to generalize this technique for chalcogenide nanowires growth...
