Springer Dez 2012, 2012. Buch. Book Condition: Neu. 235x155x28 mm. This item is printed on demand - Print on Demand Neuware - Despite the enormous diversity and complexity of financial instruments, the current taxation of hybrid financial instruments and the remuneration derived therefrom are characterized by a neat division into dividend-generating equity and interest-generating debt as well as by a coexistence of source- and residence-based taxation. This book provides a comparative analysis of the classification of hybrid financial instruments in the national tax rules currently applied by Australia, Germany, Italy and the Netherlands as well as in the relevant tax treaties and EU Directives. Moreover, based on selected hybrid financial instruments, mismatches in these tax classifications, which lead to tax planning opportunities and risks and thus are in conflict with the single tax principle, are identified. To address these issues, the author provides reform options that are in line with the dichotomous debt-equity framework, as he/she suggests the coordination of either tax classifications or tax treatments. 412 pp. Englisch.
