Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1915 edition. Excerpt: .one for the French air craft industry. While the exports to foreign countries, particularly to Russia and Great Britain, showed a slight decrease as compared with the previous year, the large government orders for aeroplanes and hydroaeroplanes have kept the factories running at their full capacity ever since the outbreak of the war. There were 177 aeroplanes, valued at \$1,731,000, exported in 1914, against 271, valued at \$1,942,000, in 1913. There were also 15 hydroaeroplanes, valued at \$167,000, exported, as compared with 15, valued at \$154,000, in 1913.--U. S. Commerce Reports. IF # John Fraser, formerly superintendent of the De La. Vergne Machine Co., New York, has opened offices at 50 Church St., New York, N. Y., as a consulting engineer. THE OSCILLATING (LOW TENSION) MAGNETO-GENERATOR. By HARRY F. GEIST. The oscillating magneto is a generator in which the movable element or rotor is moved, with respect to the stator, through a fractional part of a revolution by the force exerted by springs during their recoil. The speed at which the rotor oscillates through this arc is relatively high and the arc of oscillation is relatively short, so that the design of an efficient oscillating magneto requires .l8Ctl iC3.l considerations quite different from those essential to the ordinary rotary type of magneto. It is the purpose of this paper to analyze and discuss the oscillating mechanism, to discuss the electrical phenomena occurring in the ignition generator, especially the transients that occur during sparking. The...
