ATOMISTIC VIEW OF MINERAL-ADSORBATE INTERFACE

Condition: New. Publisher/Verlag: VDM Verlag Dr. Müller | Investigation of Fluorapatite (100) Surface and its Interface with Biomolecules Using Grazing Incidence X-ray Diffraction | Apatite is an important biomineral, which constitutes the endoskeleton (bones and teeth) in vertebrates including humans. The interaction between the apatite surface and biological environment plays a key role in biomineralization. To understand the interaction between apatite and inorganic species, atomic scale information of the apatite surface and the apatite biomolecular interface is required. In this...
