Forgotten Books, 2018. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Development of Amblystoma Punctatum, Vol. 1: External IN early March of 1878, I obtained in early stages of develop ment at number of eggs which I believed to be those of some Urodele. They were found in considerable numbers in the pools and small streams in and near the woods about Baltimore, dur ing the months of March and April. They occurred in gelatinous masses, Plate 4, Figure 30, which varied greatly in size, were usu ally more or less oval in shape, and attached to the stem of some aquatic plant or to an overhanging blade of grass. This year I was so fortunate as to secure living specimens of both sexes of Amblystoma punctatum before the females had de posited their eggs. They all did well in confinement; the males furnished an abundance of spermatozoa at the critical moments, the eggs passed through their various phases of development, and a record of the external change is preserved by a series of camera lucida drawings. The animals derived from the eggs brought to me in the Spring of 1878, were studied with considerable care and received considerable attention in respect to their food and sur rounding conditions. I was unable, however, to keep them after they reached the abranchiata stage, and in consequence could not determine what form I had been at: work upon. I was much pleased then to find upon carefully comparing the eggs laid by the adults in my aquaria this spring, their course of development and their more advanced forms, that they agree in every particular with the eggs and young forms which had occupied my attention in the previous years. By getting the eggs in...
