This item is printed on demand - Print on Demand Neuware - Diploma Thesis from the year 2008 in the subject Business economics - Economic Policy, grade: 2.0, University of Osnabrück (Fachbereich Außenwirtschaft), 90 entries in the bibliography, language: English, abstract: During the recent decades, many countries decided to get access to international financial markets by liberalizing their capital accounts. As we will see in this paper, the issues of liberalization are very complex. Many different areas like, for example, growth, inflation or the labor market are affected by it. Section 3 is meant to endow the reader with some basic tools that will be important for the understanding of the concepts that will be presented later on in this paper. This includes definitions and conceptual ideas about measuring capital account liberalization. Section 4 focuses on the theory and empirical findings. In that section, the effects of liberalization on various macroeconomic variables will be presented. Section 5 follows the thoughts...
