CreateSpace Independent Publishing Platform. Paperback. Condition: New. This item is printed on demand. 44 pages. Dimensions: 11.0in. x 8.5in. x 0.1in. This report presents results from a series of on-road verification tests performed to determine the readiness of a prototype integrated warning system to advance to field testing, as well as to identify areas of system performance that should be improved prior to the start of the field test planned for 2009. Data was collected from tests conducted on public roads using an International 8600 heavy truck equipped with the prototype safety system. The prototype system provides forward crash warning (FCW), lane change merge (LCM), and lane departure warning (LDW) functions managed by an arbitration function to address multiple crash threats. The objectives of the on-road tests were to operate the heavy truck in an uncontrolled driving environment to measure the systems susceptibility to nuisance alerts, assess alerts in perceived crash situations, and evaluate the system availability. This item ships from La Vergne, TN. Paperback.
