

## Report Chemist of the Chemist for 1904 (Classic Reprint) (Paperback)

---

By H W Wiley

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Excerpt from Report Chemist of the Chemist for 1904 The administration of boric acid to the amount of 4 or 5 grams per day, or borax equivalent thereto, continued for some time. Results in most cases in loss of appetite and inability to perform work of any kind. In many cases the person becomes ill and unfit for duty. Four grams per day may be regarded then as the limit of exhibition beyond which the normal man may not go. The administration of 3 grams per day produced the same symptoms in many cases, although it appeared that a majority of the men under observation were able to take 3 grams a day for a somewhat protracted period and still perform their duties. They commonly felt injurious effects from the dose however, and it is certain that the normal man could not long continue to receive 3 grams per day. In many cases the same results, though less marked followed the administration of borax to the extent of 2 grams, and even of 1 gram, per day, although the illness following...
