Information on water use and waste disposal practices of the residents were obtained through direct observation and oral interview of members of households randomly selected. The households sampled were 124; and single grab samples were obtained from 10 locations. Results from the study shows that 6.4% of the households have water flowing in their homes. 21.8% use water closet toilet system; what this implies is that 78.2% of the households do not have access to improved sanitation.
