Refractive Index, Absorption, Wave-Length, Rotatory Power, in Relation to Molecular Structure (Classic Reprint) (Paperback)

By Ludwik Silberstein

Forgotten Books, 2017. Paperback. Condition: New. Language: English . This book usually ship within 10-15 business days and we will endeavor to dispatch orders quicker than this where possible. Brand New Book. Excerpt from Refractive Index, Absorption, Wave-Length, Rotatory Power, in Relation to Molecular Structure It goes without saying that the value Of this index depends not only upon the chemical nature Of the substance, but to a considerable extent also on its temperature and pressure; these, however, can easily be controlled, and it can be said Without exaggeration that the value Of the refractive index, even if accurate only to four decimals, together with the temperature and pressure under which it has been obtained, are much more characteristic for a substance than, say, its Specific gravity, even when measured with very refined means. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work.
