SYMMETRY MATTERS FOR THE ELECTRONIC STRUCTURE OF LIGHT-HARVESTING

Cuvillier Verlag Aug 2008, 2008. Taschenbuch. Book Condition: Neu. 211x144x12 mm. Neuware - In this thesis the electronic structure of light-harvesting complexes from the photosynthetic apparatus of purple bacteria was investigated. The photosynthetic unit consists of mainly two different light-harvesting complexes, the peripheral light-harvesting complex LH2, and the light-harvesting core complex RC-LH1, where the charge separation takes place. The main function of these complexes is the absorption and transfer of light energy to the reaction center. This energy funnel is formed...

Reviews

Basically no words to describe. It is filled with knowledge and wisdom I am just pleased to let you know that this is actually the greatest publication I have read within my individual lifestyle and may be the best publication for at any time.

-- **Prof. Ron Gaylord II**

A top quality publication as well as the typeface used was intriguing to learn. Yes, it is play, still an amazing and interesting literature. I discovered this publication from my dad and he suggested this book to learn.

-- **Prof. Louvenia Flatley**
