Atlantic Publishing Co. Paperback. Book Condition: new. BRAND NEW, Complete Guide to Baby Sign Language: 101 Tips and Tricks Every Parent Needs to Know, Tracey Porpora, At a very young age, children are like sponges, absorbing everything they see and do, learning at an unprecedented rate. This ability to learn so quickly is what allows them to start speaking on an average between 10 months and 2 years old, and to pick up many grown-up mannerisms in infancy. American Sign Language (ASL) is the most recent discovery for infants, and is a very popular way of working their brains and teaching them not only an early form of communication, but the third-most spoken language in the United States. For those parents who teach their babies sign language at a young age and continue into childhood, it is possible for their child to learn quicker in school, and likely to be bilingual or even trilingual before reaching high school. This book will guide every parent through the process of teaching an infant the necessary steps to understand beginning sign language. You will learn what you should expect from signing, from the basics of the program to the reactions you will get from your baby. You will learn how to get started by teaching yourself first, what the first signs you should focus on for your child, and when you should start teaching. You will learn how sign language can aid in the potty training process, and how it can help your child with his or her early learning and reading skills. You will be given a complete troubleshooting section with common problems you may encounter to help you when things do not go according to plan. You will also be given details about how to instruct and teach babysitters and nannies...
