Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Intramural Project Summaries: National Cancer Institute, Division of Cancer Prevention and Control, 94 Annual Report The Surveillance Program is responsible for tracking and evaluating trends in cancer and for research on quantitative methods and statistics designed to monitor progress in cancer control for the United States. An important part of the Surveillance Program is a network of population based cancer reporting systems the Surveillance, Epidemiology, and End Results (seer) Program. Related efforts gather and disseminate information on cancer, cancer risk factors, and other elements of cancer control through a variety of reports. The Program also conducts studies on the organization, delivery, and financing of cancer prevention and control services, as well as on the economics of cancer. The Surveillance Program includes three branches: the Cancer Statistics Branch, responsible for the seer program; the Applied Research Branch, which conducts a variety of analytic and methodological studies including health services research and develops methods related to cancer surveillance and the evaluation of cancer control; and the Computer Systems Branch, which provides comprehensive computer systems analysis, design, operation, and programming support for the Division. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy.
