Createspace Independent Publishing Platform, United States, 2015. Paperback. Book Condition: New. Comprehensive. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.The BI Projects are heart of the any business organization. The IT departments need to struggle a lot to bring them into a good shape by spending thousands of man days efforts towards data validation, cleansing, transforming, consolidating and presenting to the users. At the same time the BI Project evaluation for its implementation is a challenge to any IT organization. The resources should be well understood on its activities by collecting latest information. They also need to work in collaboration with the technical teams by understanding the latest design and development requirements. At the same time they need to confirm with the users on their understanding of the latest requirements before stepping into the evaluation process. This activity denotes lot of resource educations is required for BI Projects evaluation. One might get the following questions also into their mind: What kind of techniques can be used for data transformation? Why do you need to evaluate thoroughly the BI applications? Why do you need a Big Bang kind of test coverage for BI Projects? Why do you need different environments for BI Projects? What kind of testing is involved? Is there any test automation process involved for BI projects? If you are nominated as a business representative to certify the ETL/BI Application; you might ask some of the following questions. i) Is the appropriate data being extracted? ii) If the source data element is split into multiple columns, is it done correctly during the transformation process? iii) If some data elements are merged together did any integrity problems result from this transformation process? iv) Is the data loaded correctly into the appropriate BI target...
