

Computational Network Theory

Filesize: 9.46 MB

Reviews

This composed pdf is fantastic. It normally will not expense too much. You will like how the writer write this publication.
(Dr. Jerald Hansen)

COMPUTATIONAL NETWORK THEORY

DOWNLOAD

Condition: New. Publisher/Verlag: Wiley-VCH | Theoretical Foundations and Applications | This comprehensive introduction to computational network theory as a branch of network theory builds on the understanding that such networks are a tool to derive or verify hypotheses by applying computational techniques to large scale network data. The highly experienced team of editors and high-profile authors from around the world present and explain a number of methods that are representative of computational network theory, derived from graph theory, as well as computational and statistical techniques. With its coherent structure and homogenous style, this reference is equally suitable for courses on computational networks. | Color Plates XV Preface XXXI List of Contributors XXXIII 1 Model Selection for Neural Network Models: A Statistical Perspective 1 Michele La Rocca and Cira Perna 1.1 Introduction 1.2 Feedforward Neural Network Models 21.3 Model Selection 41.3.1 Feature Selection by Relevance Measures 61.3.2 Some Numerical Examples 101.3.3 Application to Real Data 121.4 The Selection of the Hidden Layer Size 141.4.1 A Reality Check Approach 151.4.2 Numerical Examples by Using the Reality Check 161.4.3 Testing Superior Predictive Ability for Neural Network Modeling 191.4.4 Some Numerical Results Using Test of Superior Predictive Ability 211.4.5 An Application to Real Data 231.5 Concluding Remarks 26 References 262 Measuring Structural Correlations in Graphs 29 Ziyu Guan and Xifeng Yan 2.1 Introduction 292.1.1 Solutions for Measuring Structural Correlations 312.2 Related Work 322.3 Self Structural Correlation 342.3.1 Problem Formulation 342.3.2 The Measure 342.3.3 Computing Decayed Hitting Time 372.3.4 Assessing SSC 412.3.5 Empirical Studies 452.3.6 Discussions 512.4 Two-Event Structural Correlation 522.4.1 Preliminaries and Problem Formulation 522.4.2 Measuring TESC 532.4.3 Reference Node Sampling 562.4.4 Experiments 622.4.5 Discussions 702.5 Conclusions 72 Acknowledgments 72 References 723 Spectral Graph Theory and Structural Analysis of Complex Networks: An Introduction 75 Salissou Moutari and Ashraf Ahmed 3.1 Introduction 753.2 Graph Theory: Some Basic Concepts 763.2.1 Connectivity in Graphs 773.2.2 Subgraphs and Special Graphs 803.3 Matrix Theory: Some Basic...
