Forgotten Books, 2017. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Project for Improving the Navigability of the River Uruguay, Between the River Plate and Concordia To arrive at this result, the observations of February of this year have been selected because the river during this month did not undergo variations of importance in its discharge, the changes in height at the gauges between Nueva Palmira and the Estancia Humaita being solely caused by the propagation of the tides. Supposing the geometric place of the high tides to be a horizontal line, which may be admitted in the case of a river having a small slope, the average of the maxima observed at the gauges has been taken as ordinates in a downward direction and joining up the ends of the ordinates obtained in this manner, the relation of the zeros (planes of reference) at the different gauges has been found, which has allowed to refer them to that of Nueva Palmira (which is mts. Below the zero plane of reference of the Riachuelo). About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
