Forgotten Books, United States, 2015. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from The Clinical Anatomy of the Gastro-Intestinal Tract Inasmuch as the book is intended for the more practical side of the subject of anatomy, no attempt has been made to bring in the Basle nomenclature. Only a few carefully guarded terms are used, for the confusion introduced by that premature and ill-considered attempt to revise anatomical nomenclature is as great in America as it is in Britain. Some misunderstanding may arise over the lateral inguinal line. It seems to me (seep. 3 and fig. i) the happiest solution of the now considerable number of vertical lines in the neighbourhood of the old mid-Poupart line. Illustrations have not been considered essential, as every dissecting room and atlas present a profusion of illustration. Nevertheless some have been added, especially to assist the reader to grasp the new facts brought to light by radiography. For practically all of these radiograms I am indebted to Dr. A. E.Barclay of Manchester, in whose laboratory I gathered the information so valuable? to clinician and anatomist alike. In drawing together the material into book form I had help from both my British and my American colleagues, many of whom I have not space to mention by name. But to my chief. Professor Elliot Smith of Manchester, to Professor Lorrain Smith of Edinburgh, and to Professor Keith of London, I stand greatly indebted. In England, Professor J. W. Smith, Messrs. Stopford, Morley, Hughes, F.Craven Moore and Barclay, and in America, Drs. Hamann, Macleod, Ingalls, Black and F. C. Herrick have been unsparing in their help.
