Reviews

This sort of ebook is everything and got me to searching in advance plus more. I could comprehend everything out of this created e pdf. You are going to like just how the author compose this pdf.
(Prof. Ethelyn Hoeger)

LECTURES, REPORTS, LETTERS, AND PAPERS ON SANITARY QUESTIONS (CLASSIC REPRINT)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Lectures, Reports, Letters, and Papers on Sanitary Questions In the construction of many important works, engineers find that they have to contend with much hostile action of the elements; consequently it is absolutely necessary that the technical education of engineers should include a study of Meteorology - the science which (in addition to other phenomena) treats of the evolution of heat and moisture, of evaporation and condensation, of tornadoes and calms, of wind and rain, of ocean waves, river currents, land absorption, and land floods. For the purposes of this lecture, it appears desirable to omit detailed notices of abstruse meteorological questions concerning the origin of storms and electric phenomena, such as the formation of cumulous clouds, hail, tornadoes, and water-spouts. Considerations such as these, which are powerfully affected both by general causes and by local influences; would, on the present occasion, have a tendency rather to bewilder than to give information. To certain specific facts connected with the science of Meteorology, as applicable to works of water supply and drainage, this introductory lecture will, therefore, be devoted; and these facts will be set forth in simple language; my purpose being to lead you onwards, from first principles and elementary facts, to those conclusions which eventually I shall place before you. This earth consists, on its surface, of ocean and dry land, the relative areas of the two being about in proportion of 7 to 3. Assuming, therefore, the entire surface of the earth to be 200 millions of square miles, then the ocean has an area of about 140 millions of square miles, leaving an area of about 60 millions of square miles to...
