Excerpt: . . . t is not a static measure. Sanctuary from the terrorists of the 21st century demands a new level of vigilance to protect the public from known and emerging threats. Heightened awareness of new threats and proactive countermeasures are particularly imperative to protect critical infrastructure facilities, fixed assets of enormous importance to national economic and social well-being. Of those, civilian nuclear power plants stand as highly attractive targets of terrorism. Today, we ask if Federal regulators are demanding the physical security and preparedness enhancements needed to protect public health and safety from nuclear terrorism. Recent reports suggest the answer may be no. Although specific to the Indian Point reactor complex in Buchanan, NY, observations by the General Accounting Office GAO, and to a private security firm point to systemic weaknesses in nuclear incident response planning that have implications for every community within 50 miles of any of the Nations 64 active reactor sites. A release of radiation caused by terrorists is a unique event, one that requires acknowledgment..
