Reviews

Basically no phrases to clarify. It really is written in straightforward phrases rather than hard to understand. You will not sense monotony at any moment of your own time (that's what catalogues are for concerning if you ask me).
(Doris Beier)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from The University of Kansas Science Bulletin, Vol. 43: Devoted to Publication of the Results of Research by Members of the University of Kansas Detailed studies of the behavior of most common reptiles and amphibians have yet to be made. The aims of this paper are to describe: (1) behavior of the six-lined racerunner, (2) behavioral mechanisms that this and other terrestrial poikilotherms may employ in their adaptations to the changing environment, and (3) methods by which behavior of lizards can be studied. The six-lined racerunner, *Cnemidophorus sexlineatus* Linnaeus, was studied because it is by far the most active reptile in the vicinity of Lawrence, Kansas, has high metabolism, with rapid and almost continuous movements during its periods of activity (Fitch, 1956b:470), dwells in an open, xeric habitat and can thus be more easily observed than lizards that live in dense vegetation, and, its ecology has been studied (Fitch, 1958) in the vicinity of Lawrence, thus affording a foundation for correlating behavior with ecology. Abstract: A field and laboratory study of the six-lined racerunner, *Cnemidophorus sexlineatus*, was conducted in 1958. The purpose of the study was the further understanding of the role of behavior in the ecological relationships of this lizard. Food habits were studied, and it was found that choice of prey items varied with the availability of prey, sex and reproductive condition of adults, size of lizard, and between adults and young. Social behavior and dominance hierarchy were exhibited by the lizards; and behavioral releasers are the means by which individuals determine social status. Sequences of behavior are dependent upon attaining bodily temperatures within a thermal activity-range, the highest temperature of which is the...
