Humana Press Inc., United States, 2011. Hardback. Condition: New. 2011. Language: English . Brand New Book ***** Print on Demand *****. In recent years, the need to develop acceptable alternatives to conventional animal testing for neurotoxicity and developmental neurotoxicity has been increasingly recognized, and much effort is being directed toward the development of alternative models, utilizing mostly mammalian cells in culture but also non-mammalian model systems. In Vitro Neurotoxicology: Methods and Protocols presents a series of cellular, biochemical, and molecular methodological protocols in the area of in vitro neurotoxicology, with an emphasis on mammalian cell culture systems. Opening with a section on methodologies for preparing several cellular systems of variable complexity, amenable for in vitro neurotoxicological studies, the thorough volume continues with coverage of methods to measure cellular death and major mechanisms, methods for assessing mechanisms of nervous system cell toxicity related to impairment of cell signaling, while a final section illustrates additional methods for assessing important nervous system processes such as cell proliferation, neuritogenesis, and synaptogenesis. Written in the highly successful Methods in Molecular Biology (TM) series format, chapters include introductions to their respective subjects, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips...
