Modelling and Management of Engineering Processes

By Heisig, Peter / Clarkson, P. John

Condition: New. Publisher/Verlag: Springer, Berlin | Modelling for Business Improvement contains the proceedings of the First International Conference on Process Modelling and Process Management (MMEP 2010) held in Cambridge, England, in March 2010. It contains contributions from an international group of leading researchers in the fields of process modelling and process management. This conference will showcase recent trends in the modelling and management of engineering processes, explore potential synergies between different modelling approaches, gather and discuss future challenges for the management of engineering processes and discuss future research areas and topics. Modelling for Business Improvement is divided into three main parts: 1. Theoretical foundation of modelling and management of engineering processes, and achievements in theory. 2. Experiences from management practice using various modelling methods and tools, and their future challenges. 3. New perspectives on modelling methods, techniques and tools. | Engineering Process Management in Theory.- What is a Process Model? Reflections on the Epistemology of Design Process Models.- Uniqueness and the Multiple Fractal Character of Product Engineering Processes.- Approaches for Process Attendant Property Validation of Products.- Managing Complex Engineering Processes.- An Approach Towards Planning Development Processes According to the Design Situation.- Process Model Based Methodology for Impact Analysis of New Design Methods.- Design Process Planning...

Reviews

Simply no words and phrases to spell out. it was writtern extremely perfectly and useful. I am easily could possibly get a satisfaction of looking at a composed publication.

-- **Prof. Maudie Ziemann**

This publication is wonderful. I could comprehended every thing out of this published e publication. You can expect to like the way the blogger write this publication.

-- **Eliseo Rippin**
