

Principles of Biochemical Toxicology (Hardback)

Filesize: 8.48 MB

Reviews

Certainly, this is the very best work by any writer. It is loaded with knowledge and wisdom I am just quickly will get a satisfaction of reading through a created publication.

(Donavon Okuneva)

PRINCIPLES OF BIOCHEMICAL TOXICOLOGY (HARDBACK)

Informa Healthcare, United States, 2008. Hardback. Condition: New. 4th Revised edition. Language: English . Brand New Book. This leading textbook in the field examines the mechanisms underlying toxicity, particularly the events at the molecular level and the factors that determine and affect toxicity. The new edition is updated to reflect the latest research into the biochemical basis of toxicology and the growing concerns over the adverse effects of drugs, environmental pollution, and occupational hazards. Principles of Biochemical Toxicology, Fourth Edition thoroughly explains dose-response relationships, disposition and metabolism, and toxic responses to foreign compounds, and presents detailed examples to make the mechanisms of toxicity more accessible to students encountering the subject for the first time. Comprehensive in scope with a clear and concise approach, the text includes summary sections, questions and model answers, and thoroughly revised artwork that serves as an essential aid to learning and teaching. New to the Fourth Edition: * reorganized sections that cover basic principles followed by sections on different types of toxicity * extensive use of examples throughout and numerous explanatory diagrams * new material on risk assessment, export systems, oxidative stress, Thalidomide, Tamoxifen and asbestos proliferators, domoic acid, bone marrow (benzene), heart (adriamycin), blood (primaquine), biomarkers, cytochrome P450 and other enzymes, receptor mediated effects, endocrine disruption, ethanol, botox, arsenic, and more * questions with answers for each chapter for review and self-checking * expanded and updated chapter bibliographies.
