Createspace Independent Publishing Platform, United States, 2011. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. To some extent it is surprising that with all the emphasis that is given today to success (financial, emotional, business, personal, emotional), during all the years that an average individual is immersed in the formal education system, few people have had the opportunity to learn, understand and successfully apply the right structure of defining one's goals and objectives. Everything that surrounds us (including ourselves) and everything we feel, think and do, has a structure. We can begin at the structure of DNA and go all the way to the structure of the universe, passing through mechanical, architectural, mathematical, semantics, linguistic, artistic, musical structures. If everything has a structure, isn't it natural that the road to success will have one, too? When we think about it, it is striking that so many people in the world, regardless of their geographical location, economic or social position, education, religion, race, sex, etc., face obstacles on the path to their goals, that they do not know how to overcome, simply because they have not had the opportunity to find the right path or get motivated enough to find within themselves the energy, will and resources needed to overcome this obstacle.
