

Microcontroller Theory and Applications (focus on building national institutions. professional model Mechatronics Technology Curriculum Reform series of textbooks)

By ZHANG CHUN LAI SONG TIAN WU ZHU

paperback. Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 212 Publisher: China Water Resources and Hydropower Press Pub. Date :2010-03. This textbook demonstration schools for the state key construction professionals - mechatronics curriculum reform one of series of textbooks. Book mcs-51 family of 8-bit microcontroller for teaching object. described the development of SCM overview of theory and application. Book design based on a total of eight work process learning environment. the main contents include: acquaintance microcontroller. flash lights. application instructions. traffic signal control system simulation. two-way serial communication between the microcontroller. programmable application io port. simple stopwatch production. digital clock circuit design. This book can serve as institutions of higher learning electronics. electrical information to the professional class. Microcontroller Theory and Application of Technology course materials. while for the engineering and technical officers. Contents: Preface 1 learning environment learning objectives acquaintance SCM 1.1 1.3 1.2 basic theory of learning task 1.3.1 1.3.2 Overview of the microcontroller in the number of computers that Four Satisfaction guaranteed, or money back.
