Moth Catcher: An Evolutionist's Journey Through Canyon and Pass

By Michael M. Collins

University of Nevada Press. Paperback. Book Condition: new. BRAND NEW, Moth Catcher: An Evolutionist's Journey Through Canyon and Pass, Michael M. Collins, Biologist Michael Collins has been studying wild silk moths since he was a boy. This family - which includes the largest and most colorful of the North American moths - led Collins into a long career as a scientist, and has provided him with significant insights into the process by which new species evolve. "Moth Catcher" is Collins' engaging account of his development as a scientist and of his groundbreaking research. The canyon and pass environments of the American West offer a setting in which, since the last Ice Age, organisms have adapted to new surroundings and where many have formed new species. Collins has discovered in the Sierra Nevada what geneticists call a "hybrid zone" where two species interbreed. This hybrid zone is unusual because both sexes are fertile, unlike lab-bred hybrids between the same silk moth species. Collins explains how such hybrid populations serve as laboratories in nature where the process of speciation can be observed and studied. This book offers a fascinating view into the work of a field scientist and the ways that evolution continues to...
