## PHYSIOLOGICAL AND MOLECULAR RESPONSES OF CONTRASTING BARLEY CULTIVARS TO LIMITATIONS OF POTASSIUM AND WATER AVAILABILITY

Cuvillier Verlag Dez 2017, 2017. Taschenbuch. Condition: Neu. Neuware - Plants cope with drought stress conditions by adjusting transpiration and simultaneously optimizing their carbon assimilation rates. Continuous stress however, increases compounds known as reactive oxygen species (ROS) being toxic to the plants. One of the key nutrients, which aids the plants under environmental stress, is Potassium (K). It is known that optimization of K supply will mitigate the impacts of osmotic stress via increased stomatal conductance and improved assimilate translocation...
