Reactivity of organic compounds. 6. Degradability of organic compounds. Index. Organic compounds make up most of the matter found in living organism. An organic compound is any of a large class of chemical compounds whose molecules contain carbon hydrogen oxygen nitrogen with exception of carbides carbonates and carbon oxides. Organic compounds are studied in organic chemistry many of them such as proteins fats and carbohydrates (sugars) are also of prime importance in biochemistry. This objective of this book is to present a comprehensive analysis of organic compounds and their behaviour in a manner accessible to a general readership. It is our hope that this book will prove to be stimulating reading to the young chemists wishing to pursue a career in this field perhaps as a supplementary text to an advanced course in organic chemistry. We furthermore hope that it might also be of interest to all of those who have already been touched directly or indirectly by this beautiful and highly creative area of modern science and who would like to learn more about its appeal and promise. 263 pp.
