

New Trends in Integrability and Partial Solvability

Filesize: 3.18 MB

Reviews

Absolutely essential go through pdf. Indeed, it really is play, continue to an interesting and amazing literature. You will not truly feel monotony at at any time of your time (that's what catalogues are for concerning if you question me).
(Julia Mohr II)

NEW TRENDS IN INTEGRABILITY AND PARTIAL SOLVABILITY

Springer-Verlag New York Inc., United States, 2004. Paperback. Book Condition: New. 2004 ed.. 229 x 150 mm. Language: English . Brand New Book ***** Print on Demand *****.The Advanced Research Workshop New Trends in Integrability and Partial Solvability (ARW. 978791) took place in the beautiful setting of the Faculty of Medicine of Cadiz University's main room on June 13-15, 2002. Although the number of participants was 30, the lectures were attended by more than one hundred researchers from around the world who were also attending the NEEDS 2002 meeting. The aim of the organizers was to take advantage of these events to bring together researchers from the field of integrable systems and/or from the particular subject of partial integrability, in view of the current interest in combining methods and ideas arising from both areas. A wide variety of topics were covered in the talks and the subsequent discussions, including the analysis of reductions and solutions of integrable nonlinear partial differential equations and dynamical systems, new methods for the analysis of initial-boundary value problems for linear partial differential equations, quasi-exactly solvable Bose systems, the geometric theory of ordinary differential equations, exactly and partially solvable spin models, the theory of nonlocal symmetries of differential equations, and superintegrable systems. The workshop revealed the growing importance of the theory of integrable systems as well as the emerging theory of partially solvable systems. The present volume contains a series of invited contributions describing the background and recent developments of the main subjects discussed in the workshop. Special emphasis has been laid on providing self-contained and detailed presentations of the theory. M. J. Ablowitz and J. Villarroel give a detailed description of the inverse scattering for the KP equation, a keystone in the theory of integrable systems.
