

Minutes of Proceedings of the Institution of Civil Engineers Volume 108

Filesize: 4.49 MB

Reviews

This book is definitely not easy to get going on reading through but extremely exciting to see. I am quite late in start reading this one, but better then never. I am pleased to explain how here is the finest book i actually have read inside my individual daily life and may be he best book for ever.

(Mrs. Ellie Yost II)

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1892 Excerpt: .the result must be subtracted from twenty-four hours to give true mean time, or from twelve hours for civil time. If the hour angle be large, and the time be required with great accuracy, the equation of time for the day must be computed for the hour. If the body be a star, the calculated angle i is the interval of sidereal time between the observation and the star's upper culmination; and the true time must be deduced therefrom. An example of this method of finding the true mean time is given in Appendix IV. Convergence of Meridians. Convergence denotes the change in bearing of a line, running straight over the earth for some considerable distance, due to the fact that the meridians to which its bearings are referred, converge to the pole. Thus, if ABC (Fig. 17) represents such a line, which is an arc of a great circle on the earth, the only line a theodolite properly set up and levelled can run, as the telescope, on being transited, would point to the centre of the earth when downward. EP, QP, are meridians, P is the pole. The convergence on the line AB is the angular difference EAB-QBC or EAB Equator--ABP. As the exterior angle $\angle$ EAB of the triangle ABP is always greater than the interior alternate angle ABP, the true bearing of an easterly line, such as AB in the southern hemisphere, is constantly though slightly diminishing, as its distance from A increases....
