EMBRYONIC STEM CELL-LIKE CELLS IN GOAT (CAPRA HIRCUS)

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Derivation, Culture and Characterization | The objective of the present experiment was production of goat embryos either by parthenogenetic activation or by in vitro fertilization and derivation of embryonic stem (ES) cell-like cells. Firstly, the effects of different activation methods, culture systems and culture media on in vitro development of zona-free and with-zona parthenogenetic embryos were investigated. Secondly, effect of cysteamine supplementation in the in vitro maturation (IVM) or culture (IVC) media,...

Reviews

Simply no phrases to clarify. It is really basic but surprises from the 50 percent of the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.
