Reviews

It in a single of my personal favorite publication. It usually fails to charge an excessive amount of. Once you begin to read the book, it is extremely difficult to leave it before concluding.
(Mr. David Friesen IV)

WESTERN RESERVE UNIVERSITY CATALOGUE, 1897-98 (CLASSIC REPRINT) (PAPERBACK)**DOWNLOAD PDF**

Forgotten Books, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Western Reserve University Catalogue, 1897-98 Second half-year. Course I belongs to a group of three courses - Biology 1, Chemistry 1, Physics I - two of which are required of all students. I. General biology. This course in Elementary Biology forms an introduction to the study of living things from the basis of morphology, physiology and development. It is designed to illustrate by the study of a few organisms the fundamental facts of vital structure and function. The subject is treated as one discipline - the study of vital phenomena rather than as botany or zoology, for the more detailed study of which it prepares the student. It begins with the microscopical study of the cell, as illustrated by the simplest organisms, and by the tissues of higher animals and plants. This is followed by the study of mould-fungi, bacteria, algae, and the principal chemical compounds which characterize living matter. A fern, taken as a representative of vegetal organisms is then studied in detail in regard to its structure, functions, and development, and its vital phenomena are compared with those of higher and lower forms. This course is concluded with the study of one or more animal types. The student is required to make pictorial notes of her observations. Printed laboratory directions have been prepared and the following reference books are recommended: General Biology, Sedgwick 8; Wilson; Elementary Biology, Parker; Practical Biology, Huxley, Martin, Howes Scott; Outlines of Classification and Special Morphology, Goebel; Lectures on the Physiology of Plants, Vines; Atlas of Biology, Howes. One recitation, two laboratory exercises of two hours each, second half Sophomore year. About the Publisher Forgotten Books publishes hundreds of thousands of rare...
