The quantity available was very small, and therefore very small animals had to be employed. A portion injected under the skin of a mouse caused symptoms of poisoning within two minutes and death within thirty. On this evidence, which, be it remarked, was absolutely conclusive when taken as a whole, and which could be evidence of aconite only. Lampson was hanged. The above case has been related in some detail because it exemplifies the methods adopted with slight variations in the detection of all vegetable poisons. It so happens that aconite is a difficult substance to isolate chemically. The physiological tests--that is. the sensation of numbness it imparts to the tongue and its rapidly fatal action on animals--are now the ones chiefly relied on. The alkaloid is the active principle in Wolfsbane, a common hedgerow plant. India, of all countries; is where this particular poison is most used. A native once described it as useful to the sportsman for killing tigers, to the rich for putting troublesome relatives out of the way, and to jealous husbands for dealing with unfaithful spouses. Of all known vegetable poisons, aconite, and its active principle aconitine, is one of the most virulent. In rapidity of action it ranks along with atropine (belladonna) and strychnine, but is inferior to prussic acid. A (quantity only onesixteenth of a grain has proved fatal to a man....
