Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Taxonomic, Antioxidant and Phytochemical studies of wild edible vegetables of Pakistan | The aim is my present research to introduce the wild edible vegetables, and focused in the epidermal anatomy and their taxonomic importance. The quantitative analysis of the larger epidermal cell is *Allium gigantum* and *Tulipa stellata*. The larger stomata is *Allium gigantum* and *Tulipa stellata*. The smaller epidermal cell of *Centaurea calcitrapa* and smaller stomata is *Centaurea calcitrapa*. These variations differentiated the wild vegetables taxonomy proved a significant tool for the resolution of taxonomic confusion. Antioxidant compounds in wild vegetables play an important role as a health protecting factor. Scientific evidence suggests that antioxidants reduce the risk for chronic diseases including cancer and heart diseases. The higher antioxidant properties of edible vegetables is *Lamium amplexicaule*, *Sonchus asper*, *Taraxicum officinale*, *Vicia faba*, *Centaurea*, *Oxalis corniculata*, *Veronica aquolus*. The phytochemical studies are the Tannin, saponin. And Flavonoid are present and the Alkaloid and saponin are absent, in *Allium gigantum* and *stellaria media* the Alkaloid and saponin are present. Fourier transform infrared (FT-IR) spectroscopy technique, Infrared spectroscopy is one of the oldest | Format: Paperback | Language/Sprache: english | 164 pp.
