

Notes on the Auriferous Reefs of Cue and Day Dawn Volume 1; Nos. 3-7

By Andrew Gibb Maitland

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1898 Excerpt: .appearance. These banded rocks seem to have been permeated with secondary silica, which has also penetrated the surrounding rocks. Although these banded quartzites have proved auriferous, none of them have so far shown themselves to be payable; in the circumstance that these banded quartz rocks are a possible source of gold, they are identical with the quartzites of Peak Hill (to which reference has been made on an earlier page), and of Mount Margaret. The deposits of Bardoc have yielded 8,424ozs. of gold by the crushing of 11,710 tons of ore; being at the rate of 14dwts. per ton. This gold has been derived almost exclusively from quartz reefs of the first type. Our knowledge of the ore deposits in the more immediate vicinity of Broad Arrow is somewhat meagre. According to Mr. H. P. Woodward there are two principal lines of lode in the neighbourhood...
