Createspace Independent Publishing Platform, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. This is not a scientific research paper on how to statistically do well in college. It is not a warm and fuzzy book of mantras for seizing the right study habits. It is my down-to-earth, straight from the source, totally REAL explanation of what happens behind closed dorm room doors. I wrote this book across the course of my own college career, frustrated with my lack of preparedness going into so many different college situations. I tried to cover the whole spectrum, from the fun things everyone wants to talk about (like partying) to the not as fun stuff that everyone later wishes they HAD talked about (like how to sign up for classes). I do this over the entire college timeline, starting with how to write an appealing application, and ending with how to transition into the real world post graduation, plus all the juicy details in between. Whether you re a high school junior, already in college, or a doting relative who knows someone attending a university, this handy guide will provide you or your loved one with the reassurance and instruction they need to kick some major upper level education booty (while doing so safely and professionally of course). So let s get ready to survive, no, thrive, in the next major segment of your life, shall we? To see more of what this book is all about, visit or send us your questions at.
