

Getting Started Visual Astronomy

Filesize: 6.06 MB

Reviews

It is one of my personal favorite book. It is one of the most incredible ebook i have got go through. You will not feel monotony at any moment of your own time (that's what catalogues are for relating to if you ask me).
(Giuseppe Mills)

GETTING STARTED VISUAL ASTRONOMY

CreateSpace Independent Publishing Platform. Paperback. Condition: New. This item is printed on demand. 288 pages. Dimensions: 9.2in. x 7.5in. x 0.7in. **Getting Started: Visual Astronomy** focuses on beginner aspects of visual astronomy. This beginners guide covers all aspects of getting started with astronomy. From learning about the universe to understanding what to observe, how, and when, this comprehensive guide will become a go-to tool for novice and amateur astronomers. **Getting Started: Visual Astronomy** is strategically divided into sections in order to help readers learn at a manageable pace. The first section, **How We View Our Universe**, details basic astronomical functions. Readers will learn about how the Earth rotates and thus our day and night sky seems to change. Also discussed is the movement of other celestial bodies, including the sun, moon, and planets, as well as celestial objects such as asteroids and meteors. Readers will learn about light pollution and its effects on astronomical projects. With this knowledge, readers can begin to plan when and where to view the sky, based on celestial and Earthly movements and light pollution. The second section of the book, **Equipment**, is relatively self-explanatory. Various types of equipment are discussed, including binoculars, telescopes, and mounts. A breadth of information is provided on each piece of equipment. Readers will learn what can be viewed via binoculars or telescopes and the mechanisms that allow them to function. Once you learn about basic equipment, you will learn how to set it up. Discover how to find alignment, read various star maps, use supplementary computer software, and protect your gear from the elements. Now that youve learned the basics about the universe and equipment used to view celestial bodies, its time for action. Section three, **Observing**, teaches readers how to put their knowledge to use and how to be an...
