INFLUENCE OF HEAT TREATMENT ON THE MICROSTRUCTURE AND MECHANICAL PROPERTIES OF THE TITANIUM ALLOY BETA 21S

Shaker Verlag Dez 2005, 2005. Taschenbuch. Condition: Neu. Neuware - The alloy Beta 21S, with nominal chemical composition Ti-15Mo-2.7Nb-3.0Al-0.2Si (weight percent), was developed by TIMET USA in the year 1989. The alloy is being used in the engine plugs and nozzles of the Boeing 777 as well as the Airbus A-330. A major European effort is also underway to replace the heavy Nickelbase-Superalloys currently used in helicopter mufflers by lighter Titanium alloys (Beta 21S is one of the selected alloys)...

Reviews

Absolutely one of the better ebook We have ever study: it had been writtem quite completely and valuable. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Carol Lehner II**

Good electronic book and valuable one. It generally is not going to charge an excessive amount of. Its been developed in an remarkably straightforward way and is particularly simply following i finished reading this ebook through which really transformed me, change the way i think.

-- **Mr. Domenic Eichmann**

Extensive manual for book fans. It really is simplified but surprises inside the fifty percent of your pdf. I realized this pdf from my dad and i advised this pdf to discover.
